Enhanced
Methodology for
Thematic Learning in
Education using
Real-world problem solving

An Erasmus+ Strategic Partnership
Project for Innovation

2019 - 2022

Co-funded by the
Erasmus+ Programme
of the European Union

Our methodology

Through a central idea (landmines) we have worked on a series of concepts in many disciplines (art, electronics, programming, history, design, engineering, mechanization, etc.). Our most relevant product has been to create among all the students from different European centers a motorized robot (rover) for the detection of antipersonnel mines.

NEW · NEW · NEW · NEW · NEW

- Improvement in academic performance.
- Enhancement in the relationship between students and teachers.
- Recognition of the work of the teaching staff by the students.
- Improves the degree of teacher satisfaction with the work done.
- Involvement, exchange of ideas or good practices and betterment in the collaborative work of teachers.

Motivation is the basis for the development of key competencies
